PROFILE

Motivated and dedicated MERN Stack Developer with a passion for learning and adapting to new technologies. I continuously enhance my skills to build scalable, high-quality, and user-focused applications. With a growth mindset and strong problem-solving approach, I strive to contribute creatively and effectively to every project I work on.

WORK EXPERIENCE

Front-End Developer

Aug 2024 – Aug 2025

Tec – The Education Consultancy

- Developed interactive learning activities using HTML, CSS, and JavaScript to simplify complex topics for students
- Designed visually engaging pages tailored for educational content
- Worked closely with educators to translate academic concepts into intuitive web-based visuals
- Gained hands-on experience with responsive design and cross-browser compatibility

PROJECTS

Real-Time Chat Application

Tech Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js), Socket.io

- Built a real-time chat platform with secure authentication, personalized user profiles, and responsive UI themes.
- Integrated Socket.io for instant bi-directional messaging and seamless live communication.
- Designed a scalable backend architecture optimized for handling multiple concurrent user sessions efficiently.

[Live Demo](#) | [GitHub](#)

Personal Finance Tracker (Fintech Application)

Tech Stack: React.js, Firebase, Recharts, PapaParse

- Developed a modern finance management app with authentication, cloud data storage, and a sleek custom UI.
- Implemented interactive graphs, sortable transaction tables, and persistent data handling for better insights.
- Added CSV import/export functionality using PapaParse to enhance user flexibility and data control.
